DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The relevant prior art fails to show, or fairly teach, a load handling apparatus having a tiltable operating lever disposed on the body of the apparatus, with a tiltable mast that tilts forward and rearward, with load carrying forks mounted to the mast, and having a solenoid proportional control valve operatively connected to a controller, the operating lever, and a switch on the operating lever, such that the tilting speed of the mast and the lifting and lowering speed of the forks can be variably controlled in direct proportion to the tilting of the operating lever and responsive to the switch mounted on the operating lever, all in combination with all of the other claimed structural elements of the invention.

2. Any comments considered necessary by applicant must be submitted no later than payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
